

# Assignment 3: due next Tuesday (Oct 23, 2007)

## 1. Make

- Each will add artifacts (sample.tar) in your project in the repository
- Use `cs.latech.edu` to do your hand on experiment
- Add a new target in the make file to checkout the code before you compile your codes.

## 2. Download Ant and run an example given in the class. Measure time during the first build and then the rebuild.
