

MATH 100/101 DUAL ENROLLMENT

Textbook & Online Homework Information

For Math 100/101: College Algebra, the textbook is Mark Dugopolski's College Algebra (6th edition) published by Pearson (Addison-Wesley). The student edition ISBN-13 is 978-0-321-91660-0. Homework is submitted online using MathXL. At Tech, we use MyMathLab for the homework component, but I use MathXL with the dual enrollment schools because the access codes for MathXL for School are much cheaper. You should order the access codes at www.mathxlforschool.com, but you should have the students enroll in the course at www.mathxl.com.

Your Pearson (Addison-Wesley) sales representative should be able to assist you with textbooks and access codes. I would not purchase the textbooks through the Louisiana Tech Bookstore because we only offer a soft-cover, hole-punched version bundled with access to MyMathLab. This version will not hold up over time. I suspect that you will want the hardcover edition.
