

No homework is due next time.

1. Prepare for the midterm exam by working practice problems found on the Schedules and Downloads page under class 10. *You do not need to turn anything in for this question in the HW assignment.* Also, remember to look on the Schedules and Downloads page to confirm the time and place of your exam!
2. **(Due Class 12)** Prepare with your group for the temperature evaluation occurring on Class 12. Download the evaluation document (found under Class 8 on the downloads page). Have the first page filled out and all required components ready to be turned in on the day of the evaluation.
