Student Information Sheet Instructions:

- Ask students to answer the questions on the next page on a piece of paper
- Let them know that if they will come to your office during the first two weeks of the quarter to talk about the information on the sheet, they will receive …. (I do 5 bonus points on the test of their choice – I don’t have to keep track of which test to add it to – I just add it to their test total before I calculate their average at the end of the quarter).
- In addition to the questions on the form, I also ask them why they chose their major, why they chose to come to Tech, I ask specific questions about their hobbies, how classes are going, is everything making sense in our class, do they have ALEKS and WebWork working okay, do they have any questions, etc. My main goal is to get to come see me, find out where my office is, that it isn’t a painful experience, and I try to connect with them in some way. I have done this every quarter for probably 20 years!

Thanks!

Jenna
